

QUANTORA ANALYTICS

## LETTER OF RECOMMENDATION

---

**To Whom It May Concern,**

It is my distinct pleasure to recommend John Doe for the position of Data Scientist at your esteemed organization.

John Doe worked with Quantora Analytics as a Data Science Fellow from January 1, 2025 to December 31, 2025. During this time, they consistently exceeded expectations and operated with the maturity of a senior engineer.

Unlike typical internships, our program requires candidates to ship real-world software. John Doe took full ownership of a complex project: an Autonomous Customer Support Agent using LangGraph. They architected the solution from scratch, handling everything from data ingestion pipelines to deploying the model on Kubernetes.

**Sincerely,**

**Shashank Pandey**  
Technical head
